Subject: Dimock Residential Groundwater Site

Disregard my last email. I spoke with Elaine, Carroll and Dan this morning and they cleared up the scenario of Dimock and therefore the R numbers won't be used since Test America of PA is not one of our labs for this site. But the "2012" account number will need to be used for accounting purposes for ESAT is what I was told.

Have a nice day!

Judy,

Jay just told me the packets that were validated was a review of what Test America did for PA a couple of years ago. It's separate from our new analyses. Hope this helps.

Elaine

Subject: Dimock Residential Groundwater Site

I have a question on the Dimock situation. I placed in your box today 2 Dimock Oversight letters with no SDG#, no DAS or RAS #, only a Case#180-2644-01 done by Test America Lab and which none of the matrixes on these match any of the DAS's listed below. I attempted to match up matrixes on the letters to the below R numbers and only found one matrix that matched.

My question is whether there should be DAS and/or RAS numbers on the Dimock at all? The most recent one that Ed Messer is working on only gives the Case #180-3644-01. Can you shed some light on whether these "R" numbers will be used? I am aware that not all are being done by us and that makes a difference.

Dan, I am not sure how you will be able to match the current letters generated by these Oversights. FYI as of today, [Redacted] has not been generating any QA Slips for this site, the only reference I have to go by for information is the Analytical Request Forms.

DAS#

R33907 Region 3
R33908 Isotek Lab
R33909 Region 2
R33910 NAREL
R33911 Region 9
R33912 PACE
R33917 Isotek - Tier 4

Thanks for your assistance. I did approach Colleen, Elaine and Carroll today with no luck. They all indicated you or John were my best source.

Sincerely,

Judy Battee
